

What's Up at

July-August 2007

Welcome to the RMH Image Group eNewsletter. Almost everyday we hear the same statement from our customers: "I didn't know you could do that!" So in an effort to keep you better informed, each month we will spotlight a recent unique project we completed at RMH.

Outdoor Backlit Display

The best way to capture someone's attention, both day and night, is to showcase an illuminated sign. Here at RMH, we recently installed backlit graphics on the front entrance of our new building. The graphics are lit using the fluorescent lights in the lobby. They have a nice appeal during the day and light up wonderfully at night.

Above: The Backlit Graphics were attached to the inside of the windows. The Fluorescent lights in RMH's lobby illuminate the graphics at night without the use of a light box
