Steps to setup the Pronto Banner Stand

23.5" Pronto Banner Stand.

Viewable Graphic area when the stand is completed is 23.5" x 86.5".

Step 1- Set your document size to 23.5" x 92" or at a proportional size.

ex. half size setup= 11.75" x 46" quarter size setup= 5.875" x 23.2"

Step 2- Extend .5" bleed to the left, right, & top of the document.

Step 3- Make a guide .5" from the top- this area will be hidden by the top profile.

Now make a guide 5" up from the bottom of your document layout. This will insure that there is enough paper feed at the bottom to install into the Banner Stand. Extend a bleed.

Step 4- For best quality we suggest that picture resolution be set to:

150 DPI final size, 300 DPI half size or 600 DPI quarter size.

We do have quark & InDesign templates available
